```

```

            <h2>About Plasma Doners</h2>

```

```

            <p>when a patient needs blood, he/she has to contact a blood bank or a compatible
blood group of a donor in their circle, family, and friends. However, it is difficult to find suitable
donor within a limited group of people in a given time. In addition, there is no guarantee that blood
banks will have compatible blood group in stock. There is also steady increase in blood donation
requests posts in social networking sites (like Facebook, twitter, Instagram, etc.) requesting for
donation.</p>

```

<p>Ease of access, requirements of blood, and the blood donation statistics (1,2) are taken into consideration while researching the topic. There is a steady need for plasma.</p>

<p>Although this application helps finding donors, but the ease of communication with those donors is not prompt and it requires man power as the requester (patient or clinic) has to contact each donor individually. Also, there is no application that provides a proper communication channel to notify donors about the blood donation requirements.</p>

<p>Our application provides donors with functionalities including “plasma request”, “Ask for donation”, “share with friend”,(slot allotted to donate plasma), at the same time the recipient can send requests and use this application to maintain the donation activities.</p>
